### ***Caring for your Stainless Steel and Polished Brass Hardware***

Polished Brass and Stainless steel Sylvan products do require a little bit of TLC from the homeowner, to ensure the finish remains in it's purchased condition. Sea salt, dust, oil from hands and environmental conditions can cause specs or discolouration to the surface. It is essential that these surfaces are cleaned regularly (every 3 months) with a soft cloth and mild soapy water. Or for Stainless steel products use a stainless steel cleaner and lanolin to protect its surface.
